Overall Performance

The Company is an exploration stage issuer engaged in the business of acquisition, exploration and, if warranted, development of mineral properties. As such, the Company has not had any revenues since inception. The Company does not expect to generate any revenues in the foreseeable future. The Company expects to continue to incur expenses as work is performed to explore and develop its mineral property.

The Company is in the process of exploring its mineral properties and has not yet determined whether the mineral property contain reserves that are economically recoverable. The Company's future performance is largely tied to the outcome of future exploration and the overall financial markets.

The recoverability of minerals from the Company's mineral property is dependent upon, among other things, the discovery of economically recoverable reserves, the ability of the Company to obtain necessary financing to continue to explore and develop its property, and upon future profitable production. Uncertainty in credit markets has led to increased difficulties in raising and borrowing funds. As a result, the Company may have difficulties raising equity financing for the purposes of exploration and development of the Company's mineral property, without diluting the interests of current shareholders of the Company.

Commitments

At September 30, 2020, and the date of this MD&A, the Company has no commitments.

Economic Conditions

Due to the worldwide COVID-19 pandemic, material uncertainties may arise that could influence management's going concern assumption. Management cannot accurately predict the future impact COVID-19 may have on:

- Global gold prices;
- Demand for gold and the ability to carry out mineral exploration;
- The severity and the length of potential measures taken by governments to manage the spread of the virus, and their effect on labour availability and supply lines;
- Availability of government supplies, such as water and electricity;
- Purchasing power of the Canadian dollar; and
- Ability to obtain funding.

At the date of this MD&A, the Canadian federal government and the provincial government of Ontario and Quebec have not introduced measures that have directly impeded the operational activities of the Company. Management believes the current situation has not impacted management's going concern assumption. However, it is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Company in future periods.

Risk Factors

An investment in the securities of the Company is highly speculative and involves numerous and significant risks. Such investment should be undertaken only by investors whose financial resources are sufficient to enable them to assume these risks and who have no need for immediate liquidity in their investment. Prospective investors should carefully consider the risk factors that have affected, and which in the future are reasonably expected to affect, the Company and its financial position. Please refer to the section entitled "Risk Factors" in the Company's Annual MD&A for the fiscal year ended June 30, 2020 and filed under the Company's issuer profile on www.sedar.com.
