### **1. Nature of operations and going concern**

Abitibi Metals Corp. (the "Company") was incorporated under the British Columbia Business Corporations Act on September 21, 2018. The Company is in the business of acquiring and exploring mineral properties. On February 14, 2020, the Company filed a non-offering prospectus and became a reporting issuer in the provinces of British Columbia and Ontario. The Company's common shares commenced trading on the Canadian Securities Exchange ("CSE") on March 9, 2020 under the stock symbol "GSK". On October 13, 2023, the Company changed its name from Goldseek Resources Inc. to Abitibi Metals Corp. and the Company's trading symbol on the CSE changed to "AMQ". The address of the Company's corporate office and principal place of business is 1231 Huron Street, London, Ontario, N5Y 4L1, Canada.

These unaudited condensed interim financial statements have been prepared on a going concern basis, which assumes the Company will be able to realize its assets and discharge its liabilities in the normal course of operations in the foreseeable future. Realization values may be substantially different from carrying values as shown and these financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern.

The Company will require additional financing in order to further develop its exploration properties, meet its ongoing levels of corporate overhead and discharge its liabilities as they come due. While the Company has been successful in securing equity financings in the past, there is no assurance that it will be able to do so in the future and on terms acceptable to management. These events and conditions indicate a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern.

There are many external factors that can adversely affect general workforces, economies and financial markets globally. It is not possible for the Company to predict the duration or magnitude of adverse results of such external factors and their effect on the Company's business or ability to raise funds.

### **2. Basis of presentation and statement of compliance**

#### **Statement of compliance**

These unaudited condensed interim financial statements have been prepared in accordance with International Accounting Standards 34, Interim Financial Reporting ("IAS 34") using accounting policies consistent with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). These unaudited condensed interim financial statements have been prepared using the same accounting policies and methods of computation as the most recent annual financial statements for the year ending June 30, 2024, except for those noted in note 3. The unaudited condensed interim financial statements for the three months ended ended September 30, 2024 were reviewed and authorized for issue by the Board of Directors on November 28, 2024.

#### **Basis of measurement**

The financial statements have been prepared on a historical cost basis, except for certain financial instruments measured at fair value. The financial statements are presented in Canadian dollars, which is the Company's functional and reporting currency.

The preparation of these financial statements in compliance with IFRS requires management to make certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 3.

### **3. Summary of significant accounting policies**

#### **Accounting estimates and judgments**

The preparation of financial statements in accordance with IFRS requires the Company to make estimates and assumptions concerning the future. The Company's management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted for prospectively in the period in which the estimates are revised.

Estimates and assumptions where there are significant risk of material adjustments to assets and liabilities in future accounting periods include:

- Recoverable amount of its exploration and evaluation assets: Management assesses whether it is likely that exploration and evaluation costs incurred will be recovered through successful exploration and development or sale of the asset under review. Furthermore, the assessment as to whether economically recoverable reserves exist is itself an estimation process. Estimates and assumptions made may change if new information becomes available. If, after expenditure is capitalized, information becomes available suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off in the statements of loss and comprehensive loss in the period when the new information becomes available.

Significant judgments:

The preparation of financial statements in accordance with IFRS requires the Company to make judgments, apart from those involving estimates, in applying accounting policies. The most significant judgments in the Company's financial statements include:

- The Company's ability to continue as a going concern and whether there are events or conditions that may give rise to significant uncertainty.
- Deferred tax assets and liabilities: The measurement of the deferred tax provision is subject to uncertainty associated with the timing of future events and changes in legislation, tax rates and interpretations by tax authorities. The estimation of deferred taxes includes evaluating the recoverability of deferred tax assets based on an assessment of the Company's ability to utilize the underlying future tax deductions against future taxable income prior to expiry of those deductions. For deferred tax calculation purposes, management assesses whether it is probable that some or all of the deferred income tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income, which in turn is dependent upon the successful discovery, extraction, development and commercialization of mineral reserves. To the extent that management's assessment of the Company's ability to utilize future tax deductions changes, the Company would be required to recognize more or fewer deferred tax assets, and future tax provisions or recoveries could be affected.

#### **Accounting standards issued but not yet effective**

The Company has reviewed the accounting standards or amendments to existing accounting standards that have been issued but have future effective dates and determined that these are either not applicable or are not expected to have a significant impact on the Company's financial statements.
