

Job Posting: Principal Geologist

 Location: Val-d'Or, Québec

Abitibi Metals Corp. (CSE: AMQ | OTCQX: AMQFF | FSE: FW0) is a Canadian mineral exploration company focused on advancing the B26 polymetallic project in Québec. We are seeking a motivated **Principal Geologist** to join our team and contribute to our exploration programs in an environment driven by scientific rigor, operational efficiency, innovation, and resource expansion.

Reporting to the VP of Exploration, this permanent full-time position offers a unique opportunity to play a key role in advancing a leading polymetallic project within the Abitibi Greenstone Belt.

Qualifications and Experience

- Bachelor's degree in Geology or Geological Engineering from a university recognized by the OGQ or OIQ.
- Master's degree in Earth Sciences with specialization in metallogeny, geochemistry, structural geology, geophysics, or Quaternary geology, with a focus on gold and base metals, is considered an asset.
- Member of the OGQ or OIQ.
- Minimum of 5 years of proven experience in geoscientific database management, geological interpretation, and 3D modeling.
- Strong knowledge of metallogenic models related to the types of deposits targeted by the company.
- Proficiency with industry software such as QGIS/ArcGIS, Leapfrog Geo (or other 3D software), and Geotic Log.
- Solid understanding of drilling techniques and geophysical and geochemical exploration methods.
- Strong team player with tact and political awareness.
- Flexible and open to change and constructive feedback.
- Strong analytical and synthesis skills.
- Good understanding of Québec regulatory requirements and exploration permitting processes.
- Excellent communication skills and technical report writing abilities.
- Ability to work under pressure and manage multiple files simultaneously.
- Bilingual (French–English).
- Valid driver's license.

Key Responsibilities

- Oversee the integration of collected geological information and ensure database integrity.
- Perform data interpretation and 3D modeling, and update deliverables accordingly.
- Develop and implement exploration strategies aligned with company objectives.
- Interpret geological data and provide recommendations for exploration and resource development.
- Generate and propose exploration targets.
- Actively contribute to various technical and economic studies on projects, particularly resource estimates typically entrusted to external consultants.
- Serve as a technical resource by sharing expertise with the geology team.
- Collaborate with senior management to establish project budgets, schedules, and milestones.
- Provide expertise and guidance during project planning phases.
- Prepare technical reports, presentations, and investor-facing documents as required.

Conditions

- Variable and flexible schedule.
- Position based at the Abitibi Metals office in Val-d'Or or at project sites. Remote work when not on site.
- Transportation and accommodation provided for site work.
- Priority given to candidates residing in Val-d'Or or willing to relocate.
- Competitive compensation in line with industry standards.
- OGQ or OIQ membership fees reimbursed.
- Excellent group insurance benefits.

Why Join Abitibi Metals?

- Join a growing exploration company active in Québec, a world-class mining jurisdiction.
- Work on a high-potential project with meaningful impact on resource development.
- Be part of an experienced, accessible, and committed leadership team.

 **How to Apply:**

To apply, please send your CV and cover letter to Exploration Team at careers@abitimetals.com before March 15, 2026.
